Profile

I build practical tools that turn messy work into usable software: ranked lists, reports, dashboards, automations, and AI-assisted workflows. I am looking for remote internships, freelance projects, and part-time developer work where speed, ownership, and clear communication matter.

What I Can Help With

- Python scripts that automate repetitive workflows
- PDF/DOCX report generation
- React dashboards and portfolio pages
- Data cleanup and structured summaries
- Internal tools for small teams
- AI-assisted prototyping, prompt workflows, and documentation

Best Proof

Rental Research Report Generator | Python, ReportLab, python-docx, JSON

- Built a Python tool that researches rental listings, filters noisy results, ranks suitable houses, and generates decision reports in English and Tamil.
- Replaced scattered rental searching with a structured shortlist.
- Turned public listing data into a ranked report with budget and commute logic.
- Produced family-ready outputs: PDF, DOCX, Markdown, and WhatsApp summary.
- Included real-world safeguards: water, internet, safety, deposit, and agreement verification checklist.

Printing Press ERP / Business Management System | React, business workflows

- Built and deployed a practical business management system for workflow tracking and operational dashboards.

Skills

Python, JavaScript, React, Vite, Supabase, Django basics, HTML, CSS, REST APIs, PostgreSQL, Git, GitHub, GitHub Actions, Codex, ChatGPT, AI-assisted development, prompt engineering, ERP development, dashboard development, business software, automation, PDF/DOCX generation, responsive web design, UI/UX design, basic testing, CI/CD basics, CLI tools, technical documentation

Work Style

- I communicate progress clearly.
- I document setup and usage.
- I prefer small working versions over vague big promises.
- I can learn fast when the problem is real.

Education

- B.Sc. Computer Science with Artificial Intelligence, Rathinam Global University, Coimbatore - 2028
